Richard Tumaneng

Web Software Engineer

510-600-9768 | ren.tumaneng@gmail.com | San Jose, CA | linkedin.com/in/richard-t/

PROFESSIONAL SUMMARY

Web software engineer with 7+ years of experience building, optimizing, and maintaining WordPress and JavaScript-based websites. Reduced page load times by 40% and cut hosting costs by up to 72% through front-end refactoring and AWS S3 offloading. Skilled in Vue, PHP, CMS administration, and Git/GitHub deployment pipelines.

WORK EXPERIENCE

Web Developer | *A10 Networks, San Jose, California* JUL 2023 – PRESENT

- Led AI adoption by introducing Cline for code generation and performance optimization, as well as introducing and developing AI-powered chat and search functionality on the website using Copilot Studio and AddSearch.
- Architected frontend performance optimizations through JavaScript refactoring and comprehensive audits, leading to a reduction of page load times by **40%**, a 15% increase in organic traffic, and improvements on Core Web Vitals for mobile.
- Developed and maintained full-stack applications and tools using modern web technologies (Vue/SASS/HTML/JS).
- Led infrastructure migration projects including the migration of the A10 Community (to Discourse) and the Documentation site public files offloading to AWS S3 Buckets, reducing total hosting costs by **over 72%**.
- Conducted the migration of our Corporate and Support website hosting, reducing total hosting costs by **45%** and built automated deployment pipelines using Git and GitHub, streamlining continuous integration/deployment processes.
- Established analytics infrastructure using Google Analytics and Looker Studio to monitor user behavior, providing data-driven insights that optimized website performance and user satisfaction.
- Partnered with designers, product stakeholders, and marketing managers to revamp global navigation and key pages with responsive design, contributing to **10%** higher conversion rates.

Web Developer | *San Jose State H&A Marketing, San Jose, California* JUL 2019 – DEC 2022

- Developed and maintained multiple websites for the Humanities and Arts department and Hammer Theatre using WordPress, React, and other CMS platforms, ensuring high performance and reliability.
- Collaborated with product managers, graphic designers, and engineers to build custom reusable web components and pages with focus on responsive design across various screen sizes
- Coordinated project timelines with cross-functional scrum teams, ensuring on-time delivery of features while maintaining high code standards

Freelance Web Developer | *Dawoodi Language Project Website, San Jose, California* OCT 2021 – JAN 2022

- Designed and developed custom website using Omni CMS, HTML, and PHP with focus on user experience and accessibility
- Built responsive, cross-browser compatible pages ensuring consistent experience across desktop and mobile devices
- Implemented advanced SEO strategies and performance optimizations, achieving **#1** Google search ranking for target keywords “Dawoodi language" and "Dawoodi language project."

EDUCATION

Bachelor of Science in Software Engineering | *San Jose State University, San Jose, California* GRADUATED: 2022
